"I have been lucky enough to deal with HDR for the past 13 years. During this time we have successfully designed and constructed 10 workshops utilizing industry leading efficient design concepts that are cost effective and all have been delivered on time. The ongoing support is second to none, they treat you as a genuine business partner and take an interest after the job is complete to ensure satisfaction and desired results are achieved. We continually have other businesses and manufacturers visit to view our workshops. Without hesitation I would highly recommend the team to anyone wishing to construct or update an existing workshop."

Brett Alderson

Group Service Manager - Frizelle Sunshine Automotive

WELCOME TO HDR WORKSHOP SOLUTIONS

OVER 1200 WORKSHOPS DELIVERED AND STILL COUNTING!

Our Vision and Mission Statements are fundamental to the way we treat our team members and our customers.

OUR VISION

“To partner with our clients. We provide and maintain safe, hassle-free and efficient workshops”

OUR MISSION

The HDR team is a team of individuals who provide excellence in service.

We focus on providing solutions to our clients that really work.

Our clients rely on our consistent, reliable, professional approach to providing quality products and services.

Our clients have peace of mind because we find solutions to enhance safety, profitability and efficiency.

Where our competitors give up and go home, we stay focused on our clients - and on finding a solution. We never leave a client's business until they are satisfied with the results of our service.

We communicate honestly and openly with our clients at all steps of a project so that they are kept informed and are a part of the solution.

Our ideal solution is that the final outcome is always better than the client had originally hoped for.

The team treats every job as if HDR Workshop Solutions was their company... because it is their company.

We develop great team members who want to be part of a leading team.

We pride ourselves on innovation. We constantly search for new ways to deliver great service to our marketplace.

We look for ways to create raving fans - we know that our best form of advertising is through a delighted client.

Our business runs on systems. Because of this, we are recognised as a leader in the service industry.

When you begin to work with HDR Workshop Solutions you'll notice we do things differently.

Are you ready to undertake a "refurb" of your workshop? Perhaps you need to fit out a new workshop from scratch?

With HDR Workshop Solutions on your side, you'll be able to get on with your core business, while our team takes care of ensuring your workshop is delivered on time and on budget.

From the outset, you'll notice that we do things differently at HDR Workshop Solutions. You see, we take our projects very seriously. Very early on, **we'll get together with you and throw ideas around until we create a vision of how your workshop could be.** Before long we will have established a plan of action. A plan that will result in precisely the workshop you want... **precisely the workshop you need.** And guess what? It will be delivered **ON TIME.**

When it comes to delivering exceptional results, HDR Workshop Solutions has the 'runs on the board.' Over the years, we have fitted out many workshops for clients throughout Australia. Some of our recent projects include:

- Isuzu Trucks - Gaven
- JLR - Springwood
- Ferrari - Southport
- Keema Hyundai
- Mercedes Benz - Brisbane
- Holden - Northlakes
- Porsche - Gold Coast
- Audi Centre - Springwood
- Mercedes Benz - Toowoomba
- Bentley/Maserati - Gold Coast
- VW - Maroochydore
- Holden - Southport
- Toyota - Lismore
- Nissan - Southport

"Our workshop continues to operate like clockwork. It is environmentally sound, it exceeds all Workplace Health and Safety requirements and it is a very profitable workshop to boot.

Did we make the right decision on choosing you to work with us on the fit-out? Absolutely yes!"

Garry Crick Automotive

"HDR Workshop Solutions have supplied and fitted a complete lubrication system and vehicle hoist to the Cubbie Station workshop. Installation was first-rate and I cannot fault their service."

Cubbie Station

We are very proud to have opened our new workshop here at Keema Springwood, once again we teamed up with the team at HDR to carry out the design and fit out for the workshop infrastructure.

We challenged the HDR team with some very particular requirements that took a lot of lateral thinking and design. I am very happy to say they stepped up to the plate and exceeded our expectations.

Thanks to the guidance and quality of workmanship from HDR we now have one of the most attractive workshops in QLD and a work environment that our technicians are proud to work in. This has resulted in us hitting the big 3 - improved efficiencies, boosted moral and better quality of work.

HDR took the time to work with our engineers and builders to ensure our designs and dreams became reality.

Thanks HDR, I look forward to working with your team again on our next big project.

Shaun Dragona
Keema Springwood

What level of workmanship can you expect in your new project?

Your expectations will be exceeded. The workmanship is second to none and you will be delighted with every aspect of your new fitout.

HDR Workshop Solutions provide ongoing service to our clients - we strive to establish strong, long term relationships.

"Our new workshop is designed from the ground up to facilitate a streamlined working environment for our team. We could not have achieved this without the attention to detail, experience and dedication you have shown through every step of the project. Thanks again HDR Workshop Solutions for an amazing result."

Greg Robbins
Gold Coast Isuzu

The thing that impressed us most about the team at HDR was their passion and dedication to helping us build a 'model' workshop. HDR helped us with the design and layout in the initial planning stages and they were there with us throughout the build to help manage the project ensuring that the process ran smoothly and stayed "on track". They delivered peace of mind for us throughout a very complex project. Our project was delivered ontime and below budget.

In today's competitive environment, workshop solutions that promote maximum productivity and efficiency are not merely desirable, they're absolutely essential. I have no hesitation in recommending the HDR Workshop Solutions team."

Chris Walker
Mercedes Benz Brisbane

Let's create your new workshop together

So what do you need? It could be a brand new workshop or it may be a refurbishment of your existing workshop. With a little imagination you and HDR Workshop Solutions could even revolutionise the industry with your designs and visions of how a workshop SHOULD BE!

All it takes is to get together with the HDR team

To do that, you need to meet with HDR Workshop Solutions. Get in the same room. Throw ideas around. I'm pretty sure that sooner rather than later you'll love the fact that HDR Workshop Solutions are on your side.

Visit our Website for our **FREE Guide on "The 7 most important things to do when planning and building your new workshop."**

THE WORKSHOP YOU WANT. THE WORKSHOP YOU NEED.

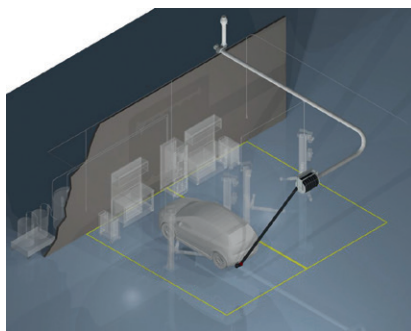

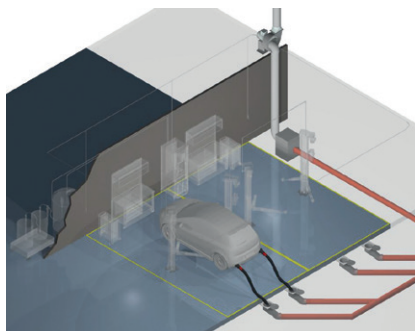

When you team up with HDR Workshop Solutions, you have a lot less to worry about.

How would you like to get on with your business, in the knowledge that your new workshop is being equipped just how you want it to be, with precise attention to detail and the efficiency of your team in mind? HDR Workshop Solutions will get the job done, no matter how small or large your project.

Here are some of the factors we consider when helping you design your new workshop.

- ✓ Vehicle Flow Through your Workshop
- ✓ Number of 'Bay Turns' per day
(How many vehicles you expect to service each day)
- ✓ Work Bay Size
- ✓ Number of Technicians
- ✓ Oil Stock Requirements
- ✓ Compressed Air Requirements
- ✓ Complete Project Coordination
- ✓ Type of Work Undertaken
(General vehicle servicing or major repair work)
- ✓ Storage Areas
- ✓ Workshop Lighting
- ✓ Quick Service Bays
- ✓ Manufacturer Requirements
- ✓ OH&S Requirements
- ✓ Workshop Controller Requirements
- ✓ Public Access
- ✓ Parts Racking and Storage
